

# DVD-2000

## Industrial DVD Player

### Product Preview

The DVD-2000 was specifically designed for commercial use and the rugged environments that come with them; including POP displays, commercial entertainment systems, and interactive kiosks. The industrial yet versatile design ensures ease-of-use and extreme functionality. The DVD-2000 is currently the only commercial/industrial DVD Player on the market that provides VGA output, and the capability to output NTSC video when playing a PAL disc. The DVD-2000 can also be connected to a touch screen by utilizing the DV-66U accessory, or be connected to another input device (such as a push button) using the DV-66K.

This product has been engineered to take whatever you can throw at it and keep playing for years of trouble free use.

**VGA output ready**

### Features

- VGA, Composite Video/Audio, Component, and S-Video outputs
